

Research in Focus 2025-2030

Created with input from our community and Canadian researchers, Fighting Blindness Canada's new Research Strategy builds on 50+ years of breakthroughs in vision science. Our goal: drive discoveries that improve outcomes and move us closer to new treatments and cures for blinding eye diseases.

Strategic Research Goals

Build the next
generation of
Canadian vision
researchers

Fund high-quality
research with
potential to improve
outcomes

Foster collaboration
to strengthen
Canada's research
ecosystem

Funding Principles

Driven by
community needs

Grounded in
scientific excellence

Focused for
greatest impact

Funding Mechanisms

1. Core grant programs (project and trainee awards)
2. Targeted research initiatives
3. National Inherited Retinal Disease Patient Registry
4. Knowledge translation activities that connect the research ecosystem
